**Subject:** Microsoft settlement

For Pete's sake, enough already. I believe it is time to end the Microsoft madness and drop these court findings that are damaging our economy. I suggest that the time will come in several decades when the public will look back on the Microsoft debacle as a time of governmental stupidity. Further, the Gates team and his current software developers will be seen in the same light as Bell, Edison and other progressive inventors. I believe I would not have the wonderful and cheap computer software if it were not for Bill Gates.

For Pete's sake just stop it.
